

Partners in Amphibian and Reptile Conservation (PARC) Habitat Management Guidelines (HMGs)

Habitat alteration, fragmentation and loss are collectively considered to be the primary challenge in the conservation of amphibians and reptiles. With their populations declining, and human populations expanding and using more land, PARC has developed a series of regionally-specific management recommendations, or Habitat Management Guidelines (HMGs) to provide proactive guidance for improving the compatibility of land management practices with these animals.

- **WHAT do the HMGs have to offer?**
These award-winning guides provide peer-reviewed, recommended management practices for amphibians and reptiles, along with alternatives when the ideal scenario is not possible.
- **WHY are the HMGs useful?**
They can inform agencies and individuals how to adapt their land management decisions to include herpetofauna, particularly in cases where they are not sure how best to begin. The HMGs are standardized in order to be applicable across regions.

PRE-ORDER FORM

Region	Qty**	Price*	International*	Total
Midwest HMG		\$10.00	\$2.50	

*Price of \$10 includes shipping and handling, unless shipping outside of the US. Please add the International shipping fee of \$2.50 for all non-US orders.

Payment options:

Check Enclosed (payable to “**Missouri Conservation & Heritage Foundation**” – please put “PARC HMG” on the memo line)

For Credit Card Payments please contact: Ms. Delinda Franklin dfranklin@highcottonusa.com at High Cotton Fulfillment Services

****For Bulk Quantity Pre-orders** (≥150 copies),
OR For Invoice Requests (to be invoiced now or upon shipment)
please contact: Ernesto Garcia ernest_garcia@fws.gov or
Priya Nanjappa Mitchell pnanjappa@fishwildlife.org
